	Examiner Harry B. Tanner	Art Unit 3744	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3744

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 3, 7 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Alsenz (4,697,431) in view of Japanese reference 2001-133053. Alsenz discloses the invention substantially as claimed. Alsenz discloses a method of operating a refrigeration system having a variable capacity compressor control 221 and expansion valve controller 10 that control the superheat at the outlet of the evaporator 214 in which the expansion valve is periodically opened in order to flush the lubrication oil from the evaporator. Japanese reference 2001-133053 teaches the use of electronic capacity control valve CV in order to control the compressor capacity of a refrigeration system. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified the system of Alsenz such that it included the use of electronic capacity control valve in order to control the compressor capacity of the refrigeration system in view of the teachings of Japanese reference 2001-133053.

Claims 2, 4-6 and 8-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Harry B. Tanner whose telephone number is (703) 308-2622. After November 19, 2004 the number will be (571) 272-4813. The examiner can
